^{*} Project in execution on an open book basis

Backlog as of March, 31st 2013

At the end of March of 2013, Tecnicas Reunidas' (TR) backlog reached a new record high of \in 6,616 million, 35% higher than 1Q 2012 backlog. The awards of 1Q 2013 amounted to \in 1,250 million.

At the end of the first quarter of 2013, 21% of the backlog were projects on an Open Book (OBE) phase, which are pending to be converted.

^{**} Project in mechanical completion or carrying out services for the start up phase of the plant

In February, the company booked the Volgograd refinery project. OAO LUKOIL, through its subsidiary LUKOIL-Volgogradneftepererabotka, awarded to TECNICAS REUNIDAS a lump sum turn-key contract for the engineering and supply of the equipment and materials, construction, pre-commissioning as well as support for commissioning of critical equipment for the vacuum gasoil deep conversion complex to be built within the existing LUKOIL's refinery located at Volgograd (Russia). The value of the contract exceeds € 1,100 million.

This contract follows a front-end engineering design (FEED) contract awarded in February 2011, as well as another services contract awarded in June 2012.

The project is the first stage of the complex, which will allow increasing the output of Euro-5 diesel fuel by 2,4 million tonnes per year (Mt/y) and TR 's scope includes the execution of one of the largest hydrocracker units in the world with a capacity of 3,5 Mt/y and a 65% conversion ratio.

In addition, Tecnicas Reunidas will participate in the Perla Offshore Project in Punta Cardon (Venezuela) for Cardon IV. The project comprises the engineering, procurement and fabrication of three 4-leg jacket-type platforms for gas production in a depth of 60 meters, as well as their installation offshore and the laying of gas export pipeline, interconnecting flowlines and fibre optic cables. Tecnicas Reunidas will execute the EPC (Engineering, Procurement and Construction) platform fabrication package.

The Perla Field was discovered by Repsol and Eni in 2009 in the Cardon IV Block. It was a major discovery in Latin-America and one of the largest in the world. The development of the project will expand the production of the field from 800 MMSCF/Day, to 1,200 MMSCF/Day. Tecnicas Reunidas, with this project, strengths its presence in the offshore market.

Cardon IV, S.A., is a joint operating company owned by Repsol (50%) and Eni (50%). PDVSA, the Venezuelan National Oil Company, has a 35% back-in right to the development of the Perla Field.

ANNEX: FILINGS WITH CNMV RELEVANT EVENTS AND OTHER COMMUNICATIONS

In the first quarter of 2013, the company filed with the Spanish CNMV the following communication:

 OAO LUKOIL, through its subsidiary LUKOIL-Volgogradneftepererabotka, awarded to TECNICAS REUNIDAS a lump sum turn key contract for the engineering and supply of the equipment and materials, construction, pre-commissioning as well as support for commissioning of critical equipment for the vacuum gasoil deep conversion complex to be built within the existing LUKOIL's refinery located at Volgograd (Russia).

The project is the first stage of the complex, which will allow increasing the output of Euro-5 diesel fuel by 2,4 million tonnes per year (Mt/y). The scope includes the execution of one of the largest hydrocracker units in the world with a capacity of 3,5 Mt/y and a 65% conversion ratio. The unconverted residue will be used as a feed for the catalytic cracking and hydro catalytic units for producing high index base oils. The sulphur content of the crude oils will be treated in a combined sulphur production unit, which includes sections for amine regeneration, sour water stripping, sulphur recovery, tail gas treatment and sulphur granulation.

The completion of the project is scheduled to take place by the end of 2015. The value of the contract awarded exceeds \in 1,100 million.

This contract follows the one for the front-end engineering design performed by Tecnicas Reunidas (awarded in February 2011) and another services contract (awarded in June 2012). The presence of Tecnicas Reunidas in the Russian Federation, as well as its commitment with Lukoil, has been reinforced by this contract.

OAO LUKOIL is one of world's leading oil companies and the second largest in Russia.
