

## **ADNOC LNG awards Tecnicas Reunidas the expansion of its gas treatment facilities in Das Island (UAE)**

ADNOC LNG has awarded Tecnicas Reunidas a new contract for the design, supply and construction of a 245 MMSCFD gas treatment plant in Das Island, in the United Arab Emirates. ADNOC LNG is owned by ADNOC (70%), Mitsui & Co (15%), BP (10%) and Total (5%).

The contract has been awarded as Lump Sum Turnkey to the consortium formed by Tecnicas Reunidas and Target Engineering and Construction, subsidiary of Arabtec Holding (UAE), for an approximate amount of 860 million US dollars and 54 months of duration, including an option to increase the scope for additional 150 million US dollars. Tecnicas Reunidas is the leader of the consortium with a participation share of 50%.

The scope of the contract includes engineering, equipment and material supply, construction, installation, testing and commissioning of compression, drying and gas treatment units, as well as power generation and other auxiliary services. The new facilities will be used to send low pressure gas coming from the offshore gas fields in the vicinity of Das Island to Habshan, located in the continental part of UAE.

This project, second executed by TR on an island in the Arabian Gulf, is part of the program Integrated Gas Development for the increase of offshore gas production. Since 2015, Tecnicas Reunidas is already participating in this program through the contract awarded by ADNOC Gas Processing for the construction of the gas treatment plant in Habshan.

This new assignment, sixth of its kind in the UAE, shows the vocation of continuity of our activities in the offshore sector and the commitment of the group to participate in the industrial and energetic development of the United Arab Emirates.

Tecnicas Reunidas is one of the leading international engineering and construction companies in the oil and gas, refining, petrochemical and power generation sectors for a wide variety of clients around the world. Since 1960, it has designed and built more than 1,000 industrial plants in more than 50 countries.
