

TO THE SPANISH STOCK MARKET COMMISSION

In compliance with the provisions of Art, 227 of Law 6/2023, of March 17, of the Securities Market and Investment Services, TÉCNICAS REUNIDAS, S.A. (the “**Company**”) hereby reports the following

RELEVANT INFORMATION

In Madrid, on July 26th, 2025.- Tecnicas Reunidas, together with its partner Sinopec Guangzhou Engineering, have been awarded a convertible FEED contract by ACWA Power for a giga scale green ammonia facility to be built in Yanbu, Saudi Arabia.

The scope of the Front-End Engineering Design includes a facility for the production of 400,000 tons per year of green hydrogen (4 GW of electrolysis) and its conversion into green ammonia through several ammonia synthesis loops and all related balance of plant and utilities, including sea water desalination and a dedicated export terminal. The renewable electricity generation (wind and solar) is an integral part of the project, but it is not included in the scope of this FEED.

The FEED contract will be performed in the next 10 months, after which, TR and its partner will present an EPC proposal for the execution of this multibillion facility, which shall be ready for commercial operations by 2030. TR had been supporting the project in pre-FEED stages before.

Hereby notified for the appropriate purposes in Madrid, on July 26th, 2025.

Laura Bravo
Secretary of the Board
